

ARCHIVE NOTE
ARCHIVE DECISION - EPA REGION VII

Site: <u>Independence Foundry-Rock Creek</u>
ID #: <u>MO0001406362</u>
Break: <u>1.0</u>
Other: <u>4-13-07</u>

SITE NAME: Independence Foundry-Rock Creek EPA ID #: MO0001406362 SS ID #: _____

Alias Site Names: _____

City: Independence State: Missouri County or Parish: Jackson County Zip Code: 64050

DECISION CHECKLIST:

No further superfund interest exists at the site based upon the following:

All CERCLIS Site work has been completed.

YES ☒ NO ☐ N/A ☐

{site assessment, RI/FS, RD, RA, O&M, all monitoring, closeout report, 5-yr review, NPL Deletion, Removal(s)}:

All Enforcement actions have been completed.

YES ☐ NO ☐ N/A ☒

{PRP has complied with all aspects of enforcement document(s), all orders and/or consent decrees have been closed out}:

All Cost Recovery actions have been completed.

YES ☐ NO ☐ N/A ☒

{final billing sent & collected, referral completed, DD completed}:

All existing monitoring wells closed in accordance with State Regulations.

YES ☐ NO ☐ N/A ☒

Date of final well closure: _____

If any of the above questions have a no response, site does not qualify for archival.

DISCUSSION/RATIONALE FOR ARCHIVAL:

In April 1995, a large volume of discolored fill was discovered along the northern bank of Rock Creek in Independence, Missouri, near the intersection of Rock Creek and Cottage Avenue. The discovery was made after the Missouri Department of Natural Resources (MDNR) received a citizen complaint about an unrelated oil spill in Rock Creek, which prompted an investigation of the creek. At the time of discovery, MDNR collected samples of the fill material. These samples indicated that the fill contained elevated levels of metals and other hazardous substances, and seeps from the fill area were entering Rock Creek.

Independence Foundry, Superior Foundry, and KC Forge and Tool were companies known to operate in the area, and each was suspected as a potential generator of the fill material. MDNR conducted a Preliminary Assessment (PA) in March 1996, and recommended that a Site Inspection (SI) be conducted for further assessment of the site. According to the Comprehensive Environmental Response, Compensation and Liability Act Information System (CERCLIS), the SI was conducted by MDNR from August 8, 1998 to April 26, 1999.

The EPA designated No Further Remedial Action Planned (NFRAP) status to this site in 1999 based on the results of the SI. No known monitoring wells were installed under the authority of the Comprehensive Environmental Response, Compensation and Liability Act/Superfund Amendments and Reauthorization Act (CERCLA/ SARA). No further response under CERCLA/SARA is required. This site has been NFRAPed and archiving is appropriate.
